

Vibe Board S1

All-in-one collaboration tool for architecture & construction professionals

What is Vibe?

- A giant “iPad” with all your go-to architectural apps.
- A digital whiteboard with real-time blueprint annotations and remote access.
- An interactive display for design walkthroughs and client-facing presentation.
- A centralized hub for visualizing construction progress across sites.

Why Choose Vibe?

- **For Architects:** Vibe Board enables real-time visual markup on architectural designs, bridging design-to-site workflows.
- **For Project Managers:** Vibe Board cuts printing costs and delays by visualizing hands-on work, keeping all stakeholders in sync.
- **For Company Owners:** Vibe Board elevates hybrid meetings into aligned collaboration, driving informed strategic decisions.
- **For ITs:** Vibe Board maximizes workspace efficiency with effortless set-up and fleet management.

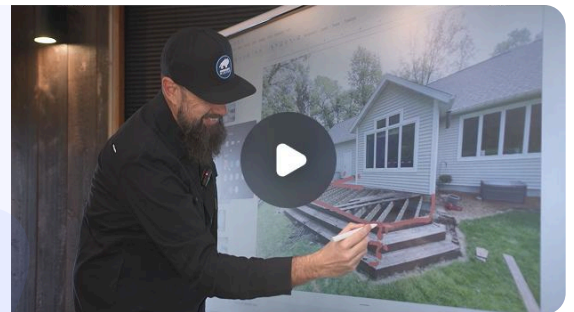

Trusted by 1,200+ AEC Firms

The Vibe Board has revolutionized how we bring designs to life. We use SketchUp for our designs. I can easily give live feedback on these details and how this thing can be built right in real time.

Dan Preston

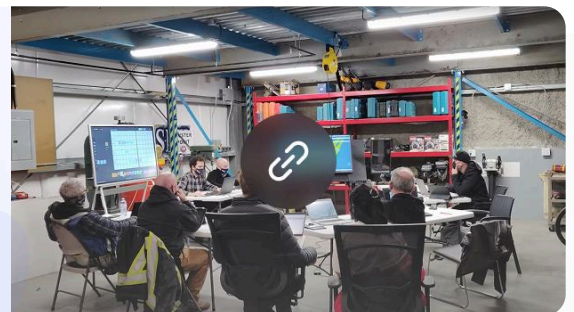

Co-Founder | Hardscape Mentor

We use Procore BIM for 3D modeling, so we can cast the model on our tablet to the Vibe Board. As a group, you can see it all together and annotate before moving on. It's very fluid.

Years construction experience

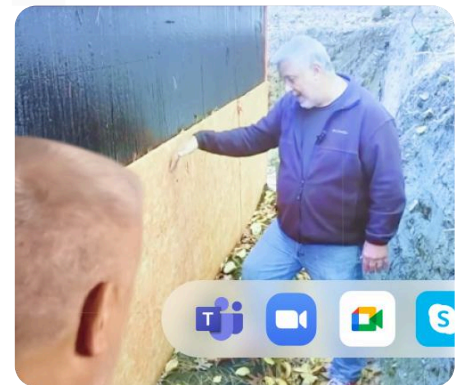

Annotate as needed

Seamlessly annotate on blueprints, images and inspection reports during presentations.

Zoom in/out

Upload images as PDF or JPEG files onto the infinite Vibe Canvas, with the flexibility to resize as needed.

Remote discussion

Discuss project progress and construction challenges with builders through zoom calls.

As an architect, a lot of my presentations are driven by what we see, not necessarily by what you hear. Vibe Board enhances practice, and has a lot more power and offerings.

Steven Baczek

Architect of 30+ years of experience
